

Battery care and safety guide

General educational guidance for the AMPRA concept. Follow the real manufacturer and vehicle instructions.

Before handling

- Wear eye and hand protection
- Keep sparks, flames and smoking materials away
- Work in a ventilated area
- Never lean directly over a battery

Routine checks

- Keep the case clean and dry
- Check that terminals are secure and corrosion-free
- Inspect the hold-down and cables
- Have the charging system checked if starting becomes slow

Storage and charging

- Use a charger suitable for the battery technology
- Follow charger and battery instructions
- Avoid prolonged discharge
- Store upright in a cool, dry, ventilated location

Replacement and disposal

- Confirm voltage, dimensions, terminals and fitment
- Use a qualified installer
- Recycle lead-acid batteries through an authorized collection point
