## OUR RANGE

# Find the Right Battery for Your Vehicle

Six specialist ranges engineered for every vehicle type — from daily drivers to heavy commercial fleets.

### Passenger Car (DIN)

European-fit batteries for sedans, hatchbacks, and SUVs. Capacity range: 35–100 Ah.

[Details on request via WhatsApp](#)

### Asian Vehicle (JIS)

Engineered for Japanese and Korean vehicles. Compact form factor with high cranking output.

[Full product page on our website](#)

### Heavy-Duty

Built for trucks, buses, and commercial fleets. Reinforced casing and extreme vibration resistance.

[Full product page on our website](#)

### Start-Stop EFB

For vehicles with start-stop and energy-recuperation systems. Double the cycle life of conventional batteries.

[Details on request via WhatsApp](#)

### Start-Stop AGM

Absorbent Glass Mat technology. Spill-proof and vibration-resistant, for high electronic loads.

[Details on request via WhatsApp](#)

### Marine

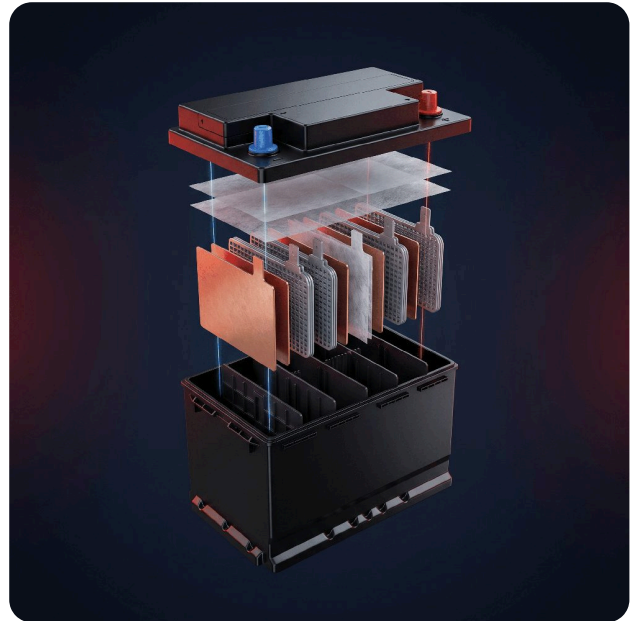

Corrosion-resistant batteries for boats and marine equipment. Deep-cycle capable in saltwater.

## Engineered with Matrix Press Technology

Matrix Press is a calcium-calcium plate production process that delivers absolute maintenance-free performance with deep-cycle capability — longer life, stronger starts, zero compromise.

- **No Short Circuit Risk**  
Precision plate separation eliminates internal short-circuit failure modes.
- **No Grid Growth**  
Calcium-calcium alloy grids resist corrosion and maintain structural integrity.
- **High Mechanical Strength**  
Compressed plate assembly withstands road vibration and physical shock.
- **Empowered Performance & Durability**  
Higher charge acceptance and faster recovery for modern vehicles.
- **Extra Vibration Resistance**  
Robust casing and plate retention designed for rough road conditions.

### Maintenance-Free

No water top-ups.  
Sealed for the life of the battery.

### Cranking Power

Reliable starts from the coldest dawn to desert noon.

### Temperature Range

-41°C to +61°C.

### Class A

European quality standards, Turkish facilities.

## OUR HERITAGE

# 87 Years of Trusted Distribution

AMPRA batteries are distributed in Egypt by Nile Vantage Automotive — a member of the Karnak Industrial Group, one of the country's longest-standing industrial houses.

## What We Promise

- **Built for this climate.** Validated at temperatures Egyptian summers actually reach.
- **Genuinely maintenance-free.** Sealed for life. No water top-ups, no acid checks.
- **A warranty honoured locally.** Claims handled by the dealer who sold the battery.
- **Available where you are.** A distribution network reaching every governorate.
